RYC Yacht cranes

RYC Yacht cranes are elegantly designed highly functional cranes intended for smaller marine lifting operations (1-10ton). The system can be delivered with the Red Rock developed Phone Control System, which enables crane handling from anywhere.

- **Revolutionary control system – Mobile phone control**
- **World Wide service team.**
- **Silent operations.**
- **Agile - 360° rotation**
- **Remote operations**
- **Timeless and compact design**
- **Highly reliable and maintenance minimized.**

Available Options:

- Customized design
- Stainless steel
- Mobile phone control system
- Radio control
- Constant Tension system acting as wave compensator
- 1-10 ton lifting capacity.
- 0.5-15m outreach

iOS & Android control:

- Full control system for cranes and davits
- Works on cell phones (iPhone and Android)
- Other equipment can be added and controlled from the same app
- Camera support – Boom end, and operations overview camera
- Customized App design and features
- Real-time equipment status

Documentation

- Red Rock Workshop Test Report
- Red Rock Declaration of Conformity
